Patriot Technologies Becomes a Primary Hardware Sourcing Partner for InfoRelay Online Systems, Inc.

InfoRelay Selects Patriot Technologies as a Hardware Sourcing Provider for Its Cloud and Dedicated Server Solutions

April 25, 2011
Sterling, VA

InfoRelay Online Systems, Inc., a leading provider of on-demand data center and hosting services, announced today that it has selected Patriot Technologies to become one of its primary hardware sourcing partners for its dedicated server channel and national cloud deployment.

Patriot Technologies, Inc. has been the trusted source for comprehensive IT security solutions and purpose-built appliance and global logistics services for over 15 years. Patriot Technologies' expertise within the industry, focus on security and complete suite of offerings made it a perfect fit as a primary hardware sourcing partner for InfoRelay. Frederick, MD-based Patriot is also within close proximity to InfoRelay's Sterling, VA headquarters, simplifying the logistics process.

"We were really drawn to Patriot's reputation and experience in working with Federal agencies. The trust they have built with Federal agencies and their history of delivering high-quality, secure products made them a great candidate," stated Brandon Tedder, Director of Sales and Marketing at InfoRelay. "We are pleased to be working with such a qualified partner."

Sterling-based InfoRelay has been delivering enterprise-level managed IT services since its inception in 1995. InfoRelay's robust service portfolio includes a wide range of offerings, from highly-redundant colocation and bandwidth to DDoS protection to automated cloud-based desktop and server-grade backup solutions. InfoRelay's partnership with Patriot will help to solidify its current service offerings by improving server and network security standards in order to meet the needs of Federal Institutions.

"Patriot is excited to be a part of the InfoRelay cloud offering," said Bruce Tucker, President and Founder of Patriot Technologies. "In addition to providing customized high performance platforms for InfoRelay's infrastructure, Patriot can also augment their security offerings which will be an important component of any cloud offering – especially to the Federal Government. This partnership is a prime example of Patriot's commitment to securing the cloud and cloud applications."

The customized hardware platforms created by Patriot's Strategic Appliance and Logistics Solutions (SALS) division are just a fragment of their complete solution, which includes manufacturing, fulfillment, distribution and support. InfoRelay will be deploying Patriot custom platforms as part of its cloud and managed services channel by the end of Q2 in 2011.

About InfoRelay Online Systems, Inc.

InfoRelay Online Systems, Inc. delivers enterprise-level managed services to small to medium-sized businesses. InfoRelay improves its clients' efficiency and profitability through the company's array of reliable IT services. By demonstrating unparalleled levels of responsiveness, concern, and overall service, InfoRelay establishes a unique trusting relationship with each client, allowing InfoRelay to act as a 24x7x365 extension of its clients' IT departments. This partnership permits InfoRelay's clients to focus on their core competencies, instead of the day-to-day concerns of hosting infrastructure. For more information, please visit www.inforelay.com, follow InfoRelay on Facebook and Twitter, or call (703) 485-4600.

About Patriot Technologies, Inc.

Patriot Technologies, Inc. is the trusted, go-to source for comprehensive IT security, and appliance and logistics solutions. Government and commercial organizations have relied on Patriot's products and services, including security technologies, professional services and appliance manufacturing to ensure the confidentiality, integrity and availability of their assets while satisfying operational requirements. The company's focus on security, expertise within the industry, life-cycle approach and complete suite of offerings has made Patriot the preferred partner of vendors and customers alike. Headquartered in Frederick, MD, Patriot is privately held and serves thousands of customers worldwide. For more information, visit www.patriot-tech.com.
